Release Notes

ELITECAD

ELITECAD ME14 R3 HF1 Update (May 2019)

☑ Improved editing of dimensions

ELITECAD ME14 R3 Update (May 2019)

☑ Macro execution was accelerated
☑ Dimensioning points are now movable via the property bar (in addition to adding and removing points)
☑ Numerous tooltips were added to the mechanical objects dialog windows
☑ The contour of a sheet with free shape can be edited now
☑ When intersecting profiles, the remaining section of the profile can be chosen
☑ Standard parts parameters sets can be saved as records for templates
☑ Manipulation functions for workspaces are now available in a docking window
☑ New creation function for rectangles via two points and height
☑ Improvement of the identifiers in the parameter dialog window of sinks
☑ DWG/DFX support for AutoCAD version 2019
☑ Correction for the display of the manual using Adobe Acrobat (Reader) DC version 2019
☑ The user interface is now available in French

☑ Various improvements according to customer feedback

ELITECAD ME14 R2 Update (December 2018)

☑ ELITECAD PARTS by CADENAS
Launch via menu EXTRAS > ELITECAD PARTS
Note: the first execution leads to the installation

☑ Deleting a selection via the "BackSpace" key (same as "Delete" key) is now possible in the graphics window
☑ The STEP - import now considers also the extension *.step
☑ Transparent depiction of the work plane
☑ A double click on a drawing calls up ME 2D instead of ME 3D, if ME 2D has been used before.

☑ Various improvements according to customer feedback
